

Sample Environment + Sustainable Energy Internship Placements

Below is a sample list of recent environment and sustainable energy internship placements. Our internship options are not limited to this list and we will continue to explore options until you are excited about your placement.

Company	Description	Possible Internship Position
	<p>WAWA is a consultancy firm for sustainable planning and green architecture. We offer our clients a comprehensive solution for green building projects using a variety of advanced methods for building planning and performance analysis. We combine passive architectural solutions with technological solutions adapted to climatic, topographical, and environmental project conditions. These provide a functionally efficient, optimal, convenient, and healthy working and living environment.</p>	<p>Position Title: Architecture Intern Internship Description: Intern will assess building models that are drawn up by the architects and run lighting simulations to demonstrate the amount of natural light that a design will receive. This information is put into a climate report that is given to clients. Requirements: Architecture degree is required.</p>
	<p>Zalul ("clear", in Hebrew) is one of Israel's leading environmental NGOs, dedicated to protecting the seas and rivers of Israel. Zalul accomplishes its mission through conservation, activism, research, awareness-raising, and education. It challenges Israel's existing power structure and strives to bring the issues of water preservation and environmental protection to the forefront of the Israeli public.</p>	<p>Position Title: Communications Intern Internship Description: Intern will be responsible for updating Zalul's English blog, help with any articles/pieces that have been loosely translated into English, build the Facebook fan page. Intern will also help with any other communications-based worked needed for Zalul in English. Requirements: Mother-tongue fluency in English is required. Passion for protecting the environment is also required.</p>
	<p>Survey of Israel is the government agency for Mapping, Geodesy, Cadastre and Geoinformatics. The Survey is responsible for the national infrastructure in these areas as well as for a number of official functions.</p>	<p>Position Title: Map Editing Intern Internship Description: The intern will mainly be responsible for editing and proofreading maps by hand. They will also be involved in small projects using the Geographic Information System (GIS). Requirements: Background or education in geography or cartography is essential.</p>
	<p>Since its establishment in 2001, Assif-Strategies has been at the forefront of the rapid evolution within the business sector, promoting cleantech innovation & environmental management, helping new businesses and established clients create business value with environmental values. It helps companies improve their environmental output, and helps with sustainability reporting.</p>	<p>Position Title: Data Analyst Internship Description: The intern will collect and analyze data to create benchmarks for environmentally conscious companies. You will use a software analysis tool to create relevant graphs from the data that you collect, and edit reports for clients. Requirements: Statistics background is helpful but not necessary.</p>
